

HOW TO - USE MIGRATION ASSISTANT TO TRANSFER FROM OLD MAC (FW800) TO NEW MAC (THUNDERBOLT) USING THUNDERBOLT TO FIREWIRE ADAPTER MAC OS X LION, OS X MOUNTAIN LION

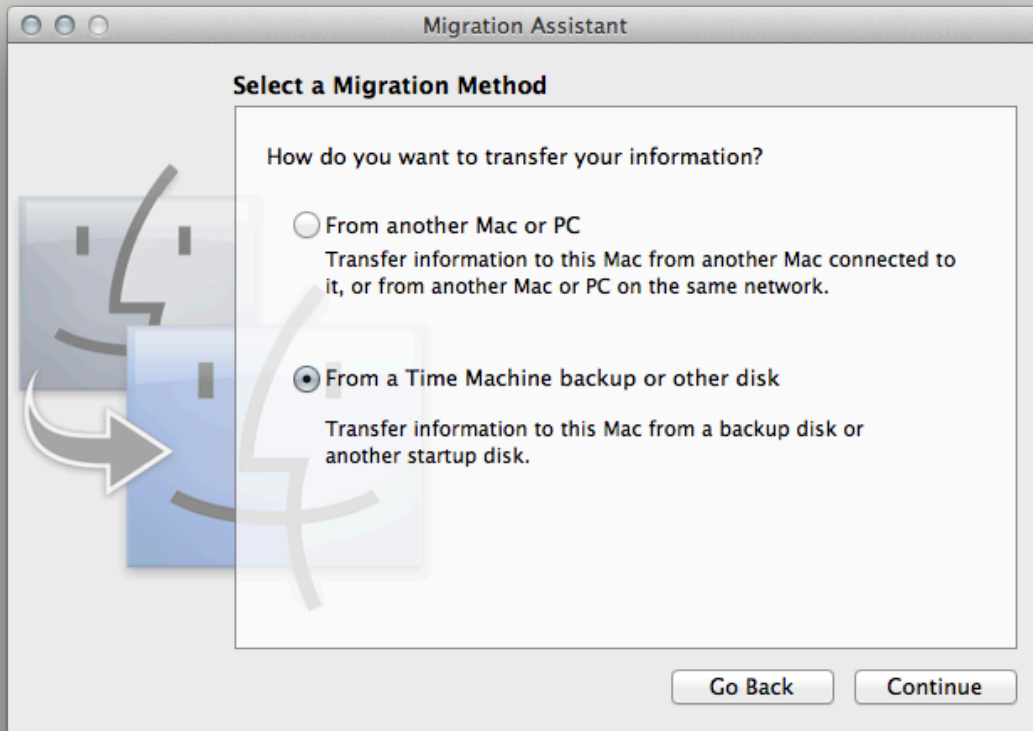

TRANSFER OLD MAC (FW800) TO A NEW MAC (THUNDERBOLT) USING THUNDERBOLT TO FIREWIRE ADAPTER

1. Make sure both computers are connected via FireWire or ThunderBolt before starting. If you connect the cables after Migration Assistant is already running, the source computer may not be properly detected.
2. Restart the **source (original) Mac** while pressing and holding the "T" key. Work through the Setup windows until Migration Assistant.
3. When the target Mac asks you for a migration method, select "**From another Mac, PC, Time Machine backup, or other disk**", and click Continue.

TRANSFER OLD MAC (FW800) TO A NEW MAC (THUNDERBOLT)

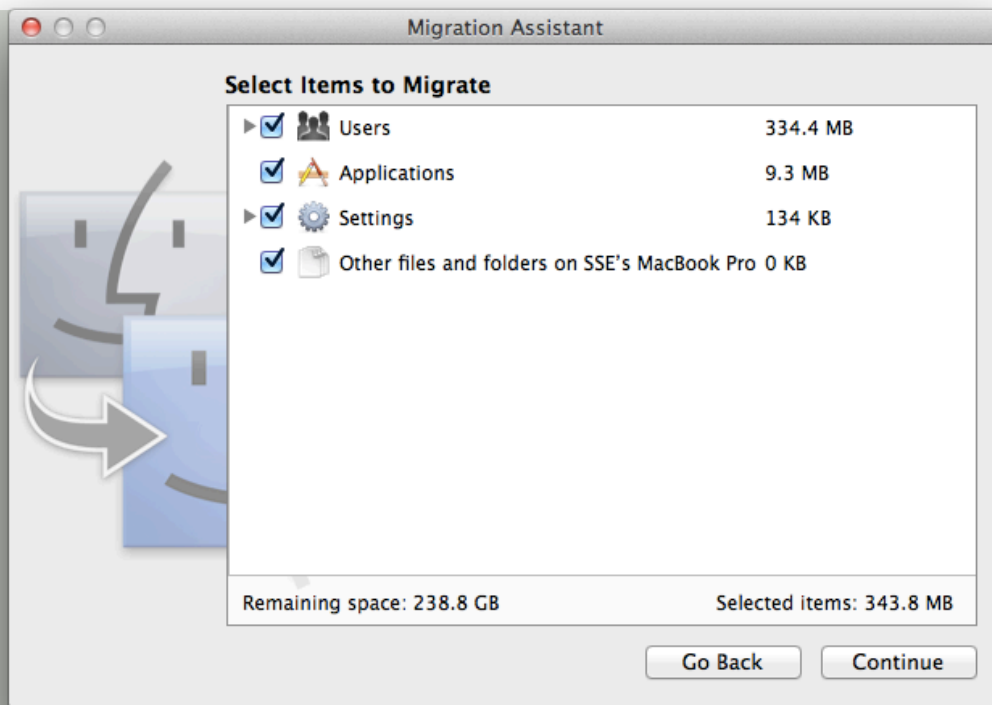

5. Type in your admin password when prompted, and click OK.
6. Select **"From a Time Machine backup or other disk"**.

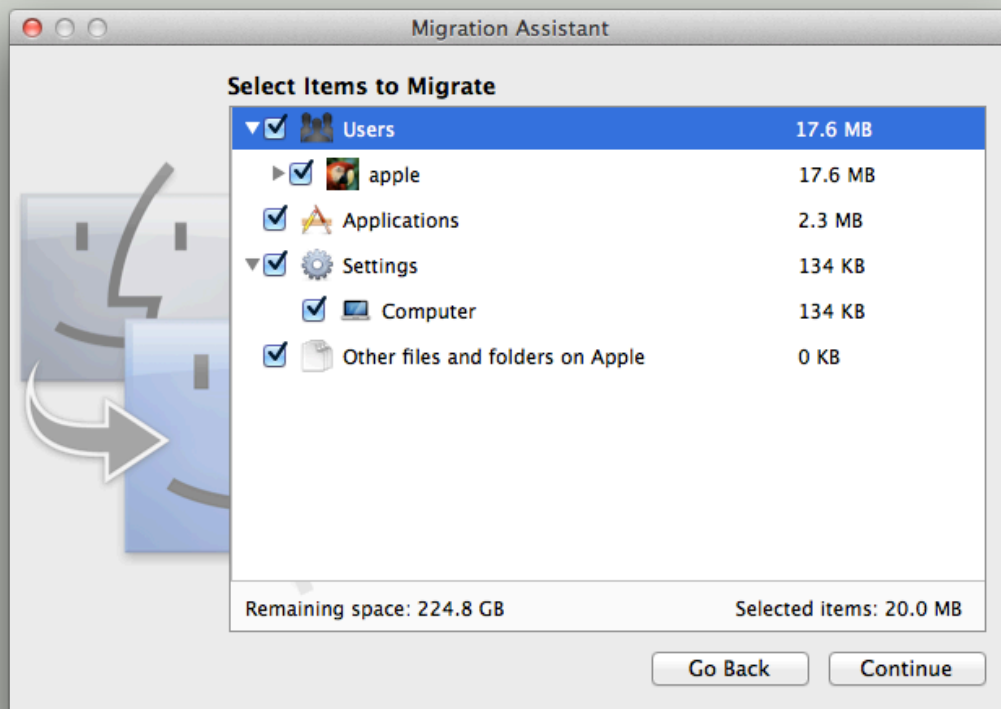

7. Select the system that you would like to migrate.

8. Your target Mac will ask you to select items to migrate.

9. Check everything is selected by clicking to expand the disclosure triangles.

10. After you click Continue, the Migration Assistant will begin to transfer files to your new Mac. The amount of time that it takes for migration to complete depends on the amount of data being transferred.

11. When you are finished copying files, locate the target computer's hard disk icon on the desktop of the host computer and drag it to the Trash or choose Eject (or Put Away) from the File menu.

12. Press the target computer's power button to turn it off.

13. Unplug the FireWire cable.
